

sim cargo and DECOEXSA combine forces

The groupage cargo network sim cargo GmbH (fusion of ILN and S.T.a.R.) restructures the system traffic to Spain. Starting from 1st January 2020, DECOEXSA, a big player for Iberia, will be integrated in the international groupage cargo network of sim cargo.

Sinzig/Madrid. On the 1st January 2020, a few changes will be made at the groupage cargo network ILN: Beside the operational start of the shared network sim cargo, which will be operated by ILN and the groupage cargo network S.T.a.R. from Homberg/Efze, the system traffic to Spain will be restructured. This was announced by the managers of both partners, Alexander Bauz (sim cargo/ILN) and Alberto Maier Plötzke (DECOEXSA). "We are happy to welcome a new strong member, which further underlines the focus on the international development of our network. DECOEXSA stands for Quality, Reliability and competitiveness. The cooperation with DECOEXSA offers an improvement to all sim cargo-partners and their clients", says Bauz.

"The vision of sim cargo and DECOEXSA is basically the same", says Alberto Maier. "The chemistry of the protagonists as well as the procedure to solve problems is exact the same at sim cargo as it is at DECOEXSA", adds the manager of DECOEXSA.

Operational Start on 1st January 2020

At the beginning an estimated amount of 4 departures, continuing the current Spain-Traffic, will be upheld. Later on, a 5th departure is planned, which reduces the transport time as it would become a daily linehaul. DECOEXSA will be connected to the TSP-system of sim cargo at the gateway Koblenz. Daily linehauls to other TSP of sim cargo as well as to the HUB in Homberg/Efze will start at Koblenz.

About DECOEXSA

DECOEXSA, founded in 1965 in Irun, is with 13 own branches in Spain and Portugal a big player on the Iberian Peninsula. The groupage headquarters is based in Madrid.
