

Exciting partnership: sim cargo and E.L.V.I.S. announce collaboration

The groupage network sim cargo GmbH and the partial and full load network E.L.V.I.S. Teilladungssystem GmbH will form strategic synergies and start doing business together as of 01.01.2024.

Sinzig/Knüllwald. The sim cargo and E.L.V.I.S. cooperations are pleased to announce this exciting opportunity. The collaboration of the systems promises to expand business opportunities for all network participants and to make the range of services even more versatile and attractive.

Alex Bauz, Managing Director of sim cargo, explains, "E.L.V.I.S. is a well-known company in the section of partial loads that has distinguished itself through outstanding performance and its commitment to the highest quality. Through strategic cooperation, we are creating a promising opportunity for our system-partners to produce oversized packages and partial loads throughout Germany."

Start of the strategic cooperation is planned for 01.01.2024

„Our team is excited about the opportunities we will offer our E.L.V.I.S. partners with this collaboration. With this, we are expanding our product portfolio to include German-wide groupage production. We are convinced that we have found the right partner for this in sim cargo.", announces Jochen Eschborn, Managing Director of E.L.V.I.S.
